---

Eric, Rene, and Jennifer –

On Monday, September 23, 2013, ARCADIS was notified by the TestAmerica's (TA) Spokane office that sample delivery group SWI0142 had failed QC parameters during analysis. See attached letter from TA to ARCADIS. Because of TA's weekend staffing conditions the samples had exceeded the hold time for nitrate before they could be re-run.

Sample delivery group SWI0142 contains samples from wells YVD-18, YVD-12, YVD-17, DC-04, DC-05D and DC-05, collected on Thursday, September 19 and Friday, September 20. In order to maintain compliance with the QAPP, ARCADIS will resample the wells delivered as SWI0142. The wells will be resampled today (Tuesday, September 24) and tomorrow (Wednesday, September 25). Sample delivery group SWI0142 will be considered void and no results reported. The resampled wells will be split between the sample delivery groups for today and tomorrow.

Please contact me with any questions.
